

Prompt 1 — E-commerce Website Privacy Policy Draft (India-specific)

Backstory:

A 29-year-old entrepreneur in Bengaluru is launching a home décor e-commerce platform targeting urban millennials. The website collects customer data such as names, addresses, payment details, and browsing history to personalize recommendations and process orders. Since the Digital Personal Data Protection (DPDP) Act, 2023 is now enforceable in India, the founder wants a clear, legally compliant privacy policy that builds user trust and avoids penalties.

Goal:

Create a privacy policy tailored for an Indian e-commerce business that covers all DPDP Act requirements, explains data usage clearly, and instills confidence in customers.

Prompt:

"You are a legal content specialist for Indian startups. Draft a Privacy Policy for an Indian e-commerce website that complies with the DPDP Act, IT Act, and Consumer Protection (E-Commerce) Rules. Structure it with clear headings: Introduction, Information Collected, Purpose of Data Processing, Data Sharing & Third Parties, Cookies & Tracking Tools, User Rights (Access, Correction, Deletion), Data Retention Periods, Security Measures, International Data Transfers, and Contact Details for Grievance Redressal. Ensure plain language, mobile-friendly formatting, and no legal jargon for general readers."

Inputs Required from User:

- Nature of e-commerce products/services
- Types of personal and sensitive data collected
- Data storage & encryption practices
- Third-party integrations (payment gateways, analytics tools)
- Customer grievance contact point

Prompt 1 — E-commerce Website Privacy Policy Draft (India-specific)

Backstory:

A 29-year-old entrepreneur in Bengaluru is launching a home décor e-commerce platform targeting urban millennials. The website collects customer data such as names, addresses, payment details, and browsing history to personalize recommendations and process orders. Since the Digital Personal Data Protection (DPDP) Act, 2023 is now enforceable in India, the founder wants a clear, legally compliant privacy policy that builds user trust and avoids penalties.

Ensure plain language, mobile-friendly formatting, and no legal jargon for general readers."

Inputs Required from User:

Privacy policy & T&C generation

- Nature of e-commerce products/services
- Types of personal and sensitive data collected
- Data storage & encryption practices
- Third-party integrations (payment gateways, analytics tools)
- Customer grievance contact point

Prompt 3 — Privacy Policy for EdTech Platform Serving Minors

Backstory:

An EdTech startup in Hyderabad offers live classes for school children. The platform collects personal data from students under 18, including their names, age, school details, recorded class sessions, and parents' contact info. Since the DPDP Act and COPPA-equivalent protections for minors are becoming stricter, the founders want a privacy policy that ensures parental consent, limited data retention, and safe online interaction between students and teachers.

Goal:

Draft a privacy policy for an Indian EdTech platform catering to minors that ensures compliance with child data protection standards.

Prompt:

"You are a child data protection specialist. Draft a privacy policy for an Indian EdTech platform that collects information from minors. Include: Scope & Applicability, Data Collection Practices, Parental Consent Process, Data Sharing Limits, Security Measures for Live Video & Chat Features, Retention Periods for Recorded Content, Rights of Parents/Guardians, and Contact Information. Ensure the language is friendly, simple, and understandable for parents while meeting DPDP Act requirements."

Inputs Required from User:

- Age group of students served
- Data points collected
- Storage & deletion policies for video classes
- Parental consent workflow
- Third-party education tools integrated

Prompt 4 — SaaS B2B Privacy Policy with Global Client Base

Backstory:

A Pune-based SaaS company provides CRM tools to clients in India, the US, and Europe. It collects both client business data and personal data of their customers. Since the business serves multiple jurisdictions, the privacy policy must comply with India's DPDP Act, GDPR (EU), and CCPA (California). The CTO wants a single unified privacy policy that covers cross-border data transfers, multiple regulatory frameworks, and security certifications.

Goal:

Draft a privacy policy for a global SaaS provider based in India, harmonizing compliance with Indian and international laws.

Prompt:

"You are a global privacy compliance consultant. Draft a privacy policy for a SaaS CRM platform with an international client base. Address: Types of Data Collected, Legal Basis for Processing (per jurisdiction), Cross-border Data Transfers & Safeguards, Third-party Hosting Providers, Data Security Measures (ISO/IEC

Privacy policy & T&C generation

27001 compliance), User Rights (DPDP, GDPR, CCPA), Data Retention Timelines, and Contact Details for Multi-region Support. Ensure clarity for both Indian and foreign clients."

Inputs Required from User:

- Client locations & markets served
- Data hosting locations
- Security certifications in place
- Cross-border transfer mechanisms (SCCs, adequacy)
- Support contact information

Prompt 5 — Privacy Policy for Fintech Lending App

Backstory:

A Mumbai-based digital lending platform collects sensitive financial data such as PAN, Aadhaar, bank statements, and credit scores from customers to process instant loans. RBI guidelines require explicit disclosure of data handling practices, and the DPDP Act demands user consent before collection. The founder needs a privacy policy that reassures customers about security while satisfying RBI and legal obligations.

Goal:

Draft a privacy policy for an Indian fintech lending app with strong emphasis on financial data security and RBI compliance.

Prompt:

"You are a fintech legal compliance expert. Draft a privacy policy for a digital lending application in India that complies with the DPDP Act, IT Act, RBI's Digital Lending Guidelines, and relevant KYC norms. Include sections for: Data Collection & Use, Consent Mechanisms, Data Storage & Encryption, Data Sharing with NBFC Partners, User Rights & Complaint Handling, Retention & Deletion Policies, and Security Audit Practices. Write in customer-friendly language with clear disclosures."

Inputs Required from User:

- Loan processing workflow
- Types of KYC and financial data collected
- Partnerships with NBFCs or banks
- Data storage & security measures
- Complaint redressal contact info

Prompt 6 — Privacy Policy for Telemedicine Platform

Backstory:

A telemedicine startup in Kochi offers online doctor consultations and digital prescriptions. The platform stores sensitive health information, patient IDs, consultation recordings, and prescription history. It also integrates with pharmacies and diagnostic labs. With telemedicine guidelines from the Medical Council of India and the DPDP Act in effect, the co-founders want a privacy policy that reassures patients, clearly outlines third-party integrations, and meets medical confidentiality standards.

Goal:

Draft a privacy policy for an Indian telemedicine service that is compliant with both health sector rules and data privacy laws.

Privacy policy & T&C generation

Prompt:

"You are a healthcare data privacy consultant. Draft a privacy policy for a telemedicine platform in India, covering: Data Collected (health records, prescriptions, consultation recordings), Purpose & Use, Consent & Withdrawal Process, Data Sharing with Pharmacies & Labs, Security Measures for Video Consultations, Retention Periods for Medical Records, Patient Rights (access, correction, deletion), and Contact Details for Grievance Handling. Write in clear, non-technical language suitable for patients."

Inputs Required from User:

- Types of medical data stored
- Third-party service providers (labs, pharmacies)
- Storage & encryption practices
- Retention timelines for patient data
- Grievance officer details

Prompt 7 — Privacy Policy for Real Estate Aggregator Platform

Backstory:

A Noida-based real estate portal connects buyers, sellers, and brokers. It collects user profile data, location information, property search history, and uploaded property documents. Since users often share sensitive personal details like ID proofs and bank info during transactions, the company wants a privacy policy that covers verification processes, data storage, and fraud prevention measures.

Goal:

Create a privacy policy for an Indian property listing and brokerage platform that inspires user trust and complies with DPDP Act norms.

Prompt:

"You are a real estate legal compliance expert. Draft a privacy policy for an Indian real estate aggregator website, covering: Data Collected (identity, property documents, transaction details), Purpose of Collection, Fraud Prevention Mechanisms, Data Sharing with Verified Brokers, Retention & Deletion Policies, User Rights under the DPDP Act, and Grievance Redressal Process. Use straightforward language to reassure users."

Inputs Required from User:

- Verification process details
- Types of documents collected
- Data sharing with third parties
- Fraud detection measures
- Retention policy

Prompt 8 — Privacy Policy for Food Delivery App

Backstory:

A Chennai-based food delivery startup collects customer addresses, GPS location, payment data, and order history. It also tracks delivery personnel through GPS. With concerns about customer location data misuse, the startup needs a privacy policy that explains exactly how location tracking works and ensures transparency in sharing data with restaurants and delivery partners.

Goal:

Draft a privacy policy for an Indian food delivery platform that clearly addresses location tracking and payment security.

Privacy policy & T&C generation

Prompt:

"You are a digital platform privacy advisor. Draft a privacy policy for an Indian food delivery application, covering: Personal & Location Data Collected, Purpose of Tracking, Sharing Data with Restaurants & Delivery Partners, Payment Information Security, Data Retention Timelines, User Rights & Opt-out Mechanisms, and Grievance Contact Info. Write in a concise, mobile-friendly format."

Inputs Required from User:

- GPS tracking policies
- Payment gateway details
- Data retention duration
- Third-party sharing practices
- Support contact info

Prompt 9 — Privacy Policy for Social Networking App

Backstory:

A Bengaluru-based startup has built a niche social networking app for Indian college students. It collects personal profiles, photos, friend connections, and chat history. The founders want a privacy policy that emphasizes safe online interactions, clearly defines moderation practices, and explains data retention for deleted accounts.

Goal:

Write a privacy policy for an Indian social networking app with strong user safety and moderation guidelines.

Prompt:

"You are a social media compliance consultant. Draft a privacy policy for a social networking app, covering: Information Collected (profiles, images, messages), Purpose & Use, Moderation & Reporting Mechanisms, Data Sharing with Law Enforcement, Retention for Deleted Accounts, User Rights under the DPDP Act, and Security Practices for Chat Encryption. Use friendly, youth-oriented language while keeping it legally compliant."

Inputs Required from User:

- Moderation policy details
- Encryption standards for chats
- Retention policy for deleted data
- Law enforcement cooperation process

Prompt 10 — Privacy Policy for Online Learning Management System (LMS)

Backstory:

A Delhi-based LMS provider serves universities and corporate clients. It collects students' and employees' learning progress, test scores, and assignment submissions. Since it hosts sensitive educational records, the provider needs a privacy policy that covers both student data and corporate training data, while complying with data protection laws.

Goal:

Draft a privacy policy for an Indian LMS platform that safeguards educational and corporate training records.

Prompt:

"You are an EdTech legal consultant. Draft a privacy policy for an LMS serving both educational institutions

Privacy policy & T&C generation

and corporates in India. Include: Types of Data Collected (student records, performance metrics), Purpose of Processing, Data Sharing with Institutions/Employers, Retention Policies, User Rights (access, correction, deletion), and Contact Details for Queries. Ensure compliance with DPDP Act requirements."

Inputs Required from User:

- Types of clients served (schools, corporates)
- Data retention timelines
- Third-party integrations (e.g., proctoring tools)
- Access control policies

Prompt 11 — Privacy Policy for Online Job Portal

Backstory:

A Gurugram-based recruitment platform matches job seekers with employers. It collects résumés, educational records, work history, salary expectations, and sometimes Aadhaar/PAN for background checks. The founders are concerned about data leaks and want a privacy policy that reassures both candidates and employers while meeting compliance standards.

Goal:

Create a privacy policy for an Indian job portal that protects sensitive career and identity data.

Prompt:

"You are a recruitment compliance advisor. Draft a privacy policy for an Indian job portal, covering: Data Collected from Candidates & Employers, Purpose of Processing, Data Sharing with Verified Employers, Retention Policies for Inactive Accounts, Background Verification Practices, Security Measures, User Rights under the DPDP Act, and Grievance Contact Information."

Inputs Required from User:

- Verification process details
- Retention period for inactive accounts
- Third-party background check vendors
- Security protocols

Prompt 12 — Privacy Policy for Digital Payment App

Backstory:

A Mumbai-based fintech company runs a UPI-enabled wallet app that stores transaction histories, bank details, and KYC documents. The company wants a transparent privacy policy explaining how financial data is protected, especially with RBI guidelines in mind.

Goal:

Write a privacy policy for a digital payment platform in India that's compliant with RBI security and DPDP Act requirements.

Prompt:

"You are a fintech compliance consultant. Draft a privacy policy for an Indian payment app, covering: Transaction Data Handling, KYC Document Storage, Fraud Detection Practices, Data Sharing with Banking Partners, RBI & DPDP Compliance, Data Retention, and User Rights. Write in simple, jargon-free language to build trust."

Privacy policy & T&C generation

Inputs Required from User:

- Payment gateway integrations
- Fraud detection mechanisms
- Data encryption practices
- KYC process details

Prompt 13 — Privacy Policy for NGO Donation Platform

Backstory:

A Delhi-based non-profit runs an online donation portal for social causes. It collects donor names, addresses, PAN numbers (for tax receipts), and payment details. The NGO needs a privacy policy that assures donors their details are safe and will not be sold or misused.

Goal:

Draft a privacy policy for a donation platform that focuses on donor trust and compliance with data protection laws.

Prompt:

"You are a non-profit legal advisor. Draft a privacy policy for an NGO's donation portal, covering: Donor Data Collection & Purpose, Payment Data Security, PAN & Tax Receipt Handling, Data Sharing with Regulatory Authorities (if required), Retention Periods, and Contact Details for Queries."

Inputs Required from User:

- Donation processing methods
- Data sharing with auditors or authorities
- Payment gateway used
- Data retention policy

Prompt 14 — Privacy Policy for Subscription-based Streaming Platform

Backstory:

A Bengaluru-based OTT platform offers regional language content. It collects viewer profiles, watch history, device information, and payment details. The founders want a privacy policy that's compliant with Indian IT rules and addresses user profiling concerns.

Goal:

Create a privacy policy for a subscription streaming service in India.

Prompt:

"You are a digital media legal consultant. Draft a privacy policy for an Indian streaming platform, covering: User Data Collected, Purpose of Profiling & Recommendations, Payment Information Handling, Device Tracking Policies, Data Retention, and User Rights. Ensure transparency around how algorithms use viewer data."

Inputs Required from User:

- Recommendation engine details
- Payment processors used
- Device tracking methods
- Retention timelines

Prompt 16 — Privacy Policy for Crowdfunding Platform

Backstory:

A Hyderabad-based crowdfunding portal collects donor details, campaign creator profiles, and payment transactions. It must ensure transparency around how donor and campaign data is stored, displayed, and shared.

Goal:

Draft a privacy policy for a crowdfunding site that protects both donors and campaign creators.

Prompt:

"You are a fintech and legal compliance expert. Draft a privacy policy for an Indian crowdfunding platform, covering: Donor Data Privacy, Campaign Creator Verification, Display of Public Information, Payment Security, Retention Policies, and DPDP Compliance."

Inputs Required from User:

- Campaign creator verification process
- Public vs. private data display rules
- Payment handling methods
- Retention policy

Prompt 17 — Privacy Policy for Ride-hailing App

Backstory:

An Ahmedabad-based ride-hailing service collects GPS location data, driver details, and payment history. Riders are increasingly concerned about how their location history is stored and shared.

Goal:

Write a privacy policy for a ride-hailing app that ensures location tracking transparency.

Prompt:

"You are a mobility services compliance advisor. Draft a privacy policy for an Indian ride-hailing service, covering: Real-Time Location Tracking, Driver & Passenger Data Handling, Data Sharing with Law Enforcement, Payment Security, Retention Timelines, and User Rights."

Inputs Required from User:

- Location data retention policy
- Payment gateway integrations
- Data sharing with authorities
- Driver onboarding verification

Prompt 18 — Privacy Policy for Online Marketplace for Handicrafts

Backstory:

A Jaipur-based marketplace sells handmade goods from rural artisans. It stores buyer and seller profiles, bank details for seller payouts, and transaction history.

Goal:

Draft a privacy policy for an online handicraft marketplace in India.

Prompt:

"You are an e-commerce compliance specialist. Draft a privacy policy for a handicraft marketplace, covering:

Privacy policy & T&C generation

Buyer & Seller Data Collection, Payment & Bank Info Handling, Data Sharing with Logistics Partners, Retention Policies, and DPDP Compliance."

Inputs Required from User:

- Bank payout process details
- Logistics data sharing rules
- Retention period
- Payment processor used

Prompt 19 — Privacy Policy for Dating App

Backstory:

A Mumbai-based dating app collects personal details, location, chat history, and profile photos. It also uses AI to suggest matches.

Goal:

Write a privacy policy for an Indian dating app with strong emphasis on user consent and safety.

Prompt:

"You are an online safety compliance consultant. Draft a privacy policy for a dating app in India, covering: Data Collected, Purpose of AI-based Matchmaking, Location Tracking Policies, Security for Chat History & Photos, Retention Timelines, and User Rights."

Inputs Required from User:

- AI recommendation details
- Retention of deleted data
- Location tracking practices
- Safety reporting process

Prompt 20 — Privacy Policy for Fitness & Wellness App

Backstory:

A Delhi-based health and fitness app tracks workouts, diet logs, and integrates with wearable devices. Since it collects health-related data, it needs a policy aligned with health data privacy norms.

Goal:

Create a privacy policy for a wellness app in India.

Prompt:

"You are a wellness tech compliance advisor. Draft a privacy policy for a health & fitness app, covering: Data Collected (workouts, diet, wearable sync), Purpose, Third-Party Sharing (nutritionists, trainers), Security Measures, Retention Policies, and User Rights."

Inputs Required from User:

- Wearable integrations used
- Retention period for health logs
- Trainer/nutritionist data sharing rules
- Encryption practices

Prompt 21 — T&C for SaaS Productivity Tool

Backstory:

A Chennai-based SaaS platform offers task management software to corporates. They want Terms & Conditions that clearly define usage rights, subscription terms, and liability limitations.

Goal:

Draft Terms & Conditions for an Indian SaaS platform.

Prompt:

"You are a SaaS contract drafting expert. Draft T&C for a productivity SaaS tool, covering: User License Terms, Subscription & Renewal Policies, Limitations of Liability, Data Ownership, Termination Clause, and Governing Law (India)."

Inputs Required from User:

- Subscription model details
- Data ownership policy
- Termination triggers
- Refund policy

Prompt 22 — T&C for Online Retail Store

Backstory:

An Indore-based fashion retailer sells products via their own website. They need T&C covering orders, returns, and disputes.

Goal:

Write Terms & Conditions for an Indian online retail store.

Prompt:

"You are an e-commerce legal consultant. Draft T&C for an Indian retail site, covering: Ordering Process, Payment Terms, Return/Refund Policy, Delivery Timelines, and Governing Law."

Inputs Required from User:

- Return & refund window
- Shipping policies
- Payment gateways used
- Dispute resolution mechanism

Prompt 23 — T&C for Event Ticketing Platform

Backstory:

A Bengaluru-based ticketing site sells passes for concerts and sports events. They need T&C addressing cancellations and resales.

Goal:

Draft T&C for an event ticketing platform in India.

Prompt:

"You are an events compliance consultant. Draft T&C for an Indian ticketing site, covering: Ticket Purchase Terms, Cancellation/Refund Rules, Resale Restrictions, Event Changes/Cancellations, and Governing Law."

Privacy policy & T&C generation

Inputs Required from User:

- Refund policy timeline
- Event change notification process
- Ticket transfer rules
- Delivery method (digital/physical)

Prompt 24 — T&C for Digital Marketing Agency Website

Backstory:

A marketing agency in Kolkata offers SEO, PPC, and branding services. They need T&C that covers service scope and payment terms.

Goal:

Write Terms & Conditions for a marketing services website.

Prompt:

"You are a business contract consultant. Draft T&C for a digital marketing agency in India, covering: Scope of Services, Payment Schedule, Client Responsibilities, Confidentiality, Termination, and Governing Law."

Inputs Required from User:

- Service packages offered
- Payment milestones
- Confidentiality clauses
- Termination notice period

Prompt 25 — T&C for Mobile Gaming App

Backstory:

A Hyderabad-based gaming studio has launched a mobile game with in-app purchases. They need T&C to cover virtual goods, user conduct, and dispute resolution.

Goal:

Draft Terms & Conditions for an Indian mobile game.

Prompt:

"You are a gaming industry legal advisor. Draft T&C for a mobile game, covering: User Conduct Rules, Virtual Goods Ownership, Payment Terms, Refunds (if any), and Governing Law."

Inputs Required from User:

- Virtual currency usage rules
- Refund policy
- Age restrictions
- User reporting mechanism
